SUMMARY

Product manager who builds the systems that connect demand to supply, and now owns the business outcome they produce. 4+ years across digital product, growth, and partnerships — 3+ of them in consumer lending at Bajaj Finance, India's largest retail NBFC. Started on the platform side, owning the Personal Loan application journey through the channel's scale-up from **~₹400 Cr to ~₹1,100 Cr in monthly disbursements**. Now on the business side of the mortgage portfolio, carrying the **~₹100 Cr/month disbursement number** against a **~₹1,500 Cr** annual mandate and running a matching engine that qualifies **~90,000 leads/month** against credit criteria and routes them across a 9-partner network. Work where product, commercial, and partnerships meet, with a ~20-member cross-functional pod across 10 functions.

CORE SKILLS

Data & Tools: SQL, Google Analytics, CleverTap, Looker Studio, A/B Testing, MS Excel, Azure DevOps, Google/Meta Ads, SEO

PROFESSIONAL EXPERIENCE

BAJAJ FINANCE LTD. | Pune

Jun 2023 – Present

Product Manager – Home Loans: Digital Growth & Lending Partnerships

Dec 2025 – Present

- Own the business side of digital acquisition for the mortgage portfolio (Home Loans, LAP, Balance Transfer, Top-up), **carrying the disbursement number for an online channel at ~₹100 Cr/month (~₹1,200 Cr annualised)**, up from ~₹80 Cr, against a full-year mandate of **~₹1,500 Cr**.
- Designed and shipped the **MCP (Minimum Credit Parameters) Master and Lead Allocation Master** — a two-sided matching engine that scores **~90,000 leads/month** against each partner's credit criteria and routes every lead to its best-fit lender, lifting **lead-to-login conversion 40%** and **lead-to-disbursement from 0.5% to 0.7%** at a **~40% approval rate** and **50% match rate**.
- Grew the live partner network from **4 to 6 lenders (2 more in build)**, negotiating lead-exchange and commission economics with Legal, Business, and Technology so a single customer can be matched against multiple partners' criteria and monetised through distribution.
- Made the call to optimise for **qualified demand over raw lead volume**, accepting lower lead counts — feeding qualification outcomes back into campaign targeting to cut **cost per lead 33%, from ~₹1,350 to ~₹900**.
- Built a **lead-reassignment model** that re-routes customers declined by their first partner to the next-best match on the priority list, recovering demand that would otherwise be lost and raising overall utilisation of every lead acquired.
- Part of a **~20-member cross-functional pod** (product, engineering, growth, CX, analytics) with **2 direct reports**, aligning **10 functions** — Business, Sales, Call Centre, Credit Policy, Risk, Legal, Compliance, IT, CX, and Marketing.
- Define the capability roadmap and requirements for the channel as its business owner — translating the disbursement target into product, policy, and partner asks for Technology, Credit, and Legal to build against.

Next Best Product Engine (in progress): Building a cross-sell framework that checks eligibility across adjacent products when a customer fails the primary product's criteria, using a propensity model to surface the top 3 relevant offers inside the same journey — converting declined applicants into retained demand instead of lost traffic.

Product Manager – Personal Loans: Digital Platform

Jun 2023 – Nov 2025

- Owned the Personal Loan digital platform (app and web) at **~15 lakh Form-1 submissions/month**, turning business and credit requirements into shipped capability while the channel scaled from **~₹400 Cr to ~₹1,100 Cr in monthly disbursements** through a period of sector-wide tightening in consumer credit.
- Rebuilt the application journey with UI/UX — cutting drop-off **40%** and completion time **15%**, lifting completed applications **30%** and automating **22% more of the journey end-to-end** through straight-through processing.
- Lifted conversion **23%** and user acquisition **14%** by instrumenting the journey in Google Analytics and CleverTap, isolating the cohorts that dropped, and sequencing fixes by revenue impact rather than ticket count.
- Ran the full **product lifecycle** for platform releases — requirement intake, PRDs, design, build, QA, deployment, and post-launch iteration — as the primary interface between business stakeholders and Engineering on scope, trade-offs, and release status.

GYDE AI Voice Assist: Shipped conversational voice assistance inside the application form to guide applicants through completion, lifting Form-1 submissions **~3.5%** — roughly 50,000 additional submissions per month at platform scale.

Microfinance Loans – 0→1 Digital Journey: Launched digital lead creation for Microfinance group loans on app and web from scratch, generating **~2,000 leads/month** and opening an underserved customer segment to digital origination.

KANTHA INDIA | Digital Marketing Associate

May 2019 – Apr 2020

- Ran paid acquisition end-to-end — restructuring Meta (Facebook and Instagram) campaigns across copy, targeting, and budget allocation to cut **cost-per-click 58%** and improve **return on ad spend 35%**.
- Raised the website's SEO score from 34 to 51 through on-page and off-page optimisation, driving a **22%** increase in organic traffic, and built content calendars with design partners that lifted click-through rates **15%**.

VOXTURR CONSULTING | Product Marketing Intern

Jun 2022 – Jul 2022

- Built the go-to-market strategy for a packaged-foods launch and ran the pre-launch campaign across creatives, landing page, and budget allocation.
- Ran market research and competitive pricing analysis for the client's cloud-kitchen operations, identifying the locations with highest revenue potential.

EDUCATION

Delhi School of Economics — MBA (International Business)

2021 – 2023

Manipal Institute of Technology — Bachelor of Technology (B.Tech)

2015 – 2019
